Burgess Cloud Consulting

Code Review Packaged Service

CODE AUDIT PROCESS

AGREE SCOPE

We work with you to understand your concerns with your current APEX code and agree the priorities for improving your code base moving forward.

REVIEW CLASSES & DEPENDENCIES

Deep dive into what your classes/triggers do and any dependencies found

TRIGGERS

Next, we look at the triggers and how and when they call the classes.

CODE QUALITY & BEST PRACTISES

Throughout the code review we are constantly checking if best practices have been applied and level of test code coverage. Here we summarise our findings in the context of the whole code base.

INITIAL FINDINGS REPORT

We review our initial findings with you and agree next steps for example refactoring code, increasing test classes, applying coding best practise or removing redundant setup

REFACTOR CODE

Refactor the code based on the objectives agreed based on the initial findings report. Test and sign off.
